

The Ultimate Buyer's Guide to Concrete Coatings

PERMASURFACE.COM

Welcome to PermaSurface!

02

Our Mission & Vision

At **PermaSurface**, our mission is to deliver exceptional coating solutions with precision and integrity. With over 50 years of combined experience, our team is committed to outstanding results while supporting our employees and community. We source high-quality materials from a trusted U.S. manufacturer in Ohio, where our purchases support U.S. Military Veterans through the Wounded Warrior Family Support Foundation.

How Do I Choose the Right Coatings System?

When selecting a coatings system for your project, we will consider these key factors:

Traffic Type & Volume: Determine whether the floor will face foot traffic, vehicular traffic, or heavy machinery, as this affects durability and abrasion resistance.

Environmental Exposure: Choose a coating based on exposure to heat, chemicals, moisture, and humidity—important for industrial, kitchen, or basement floors.

Aesthetic Needs: Select the color, finish, and design that suit the space, whether a glossy finish, matte, or decorative patterns.

Concrete Condition: Assess the floor's condition (e.g., cracks or moisture) to determine the appropriate preparation and vapor barrier.

Durability: Ensure the coating offers the right level of wear resistance for the expected usage and is easy to maintain.

Cure Time: Factor in the time required for the epoxy to fully cure, especially for high-traffic areas.

Regulatory Compliance: Ensure the coating meets relevant health, safety, and environmental standards.

By evaluating these factors, **PermaSurface** will guide you in choosing the perfect epoxy for unbeatable, long-lasting floor protection that stands up to any challenge!

How Much Will This Cost?

The cost of a coatings project can vary based on factors like materials, project size, and the prep work needed and investing in the right coating system is a wise decision that pays off in the long run. At **PermaSurface**, we'll work with you to assess your needs, preferences, and budget to recommend the best solution specific to you. Our detailed, customized estimate ensures you're making an informed choice because a well-executed coatings project not only enhances the appearance and durability of your surfaces but also provides lasting protection to ensure the safety of all who use the space. *It's an investment that delivers years of worry-free service and peace of mind.*

Installation Process Overview

The installation process varies depending on several factors, including the project size, required preparation, and material choices. Here's an overview of what to expect:

Preparation Requirements:

The concrete slab must be solid and dry, with proper moisture content. For recently poured concrete, ensure a curing period of at least 28 days before a coatings installation. We always conduct moisture testing to confirm surface readiness.

Surface Preparation:

We employ comprehensive guidelines for proper surface preparation to ensure optimal adhesion and performance of the coating.

Product Characteristics:

Our coatings are formulated to be low-odor and low-VOC, ensuring a safer and more comfortable installation process. All of our products are VOC-compliant, and any odors typically dissipate once the coating is fully cured.

Curing and Walkability:

Most coatings are walkable within 24 hours of application, though heavier traffic or vehicular use may require up to 72 hours for full curing.

Fast-Dry Options:

To minimize downtime, **PermaSurface** offers fast-dry and quick-turnaround solutions, allowing the area to be returned to use in a timely manner.

By following these guidelines, we ensure a smooth and efficient installation process with minimal disruption to you.

Maintenance Overview

Maintaining our coating systems is both simple and straightforward. Routine cleaning is essential to ensure the longevity and performance of the surface. Regular cleaning helps to remove dust, grit, and debris, which can cause surface damage over time, especially with high traffic. In the event of a chemical spill, prompt cleaning is necessary to prevent potential damage. We recommend using a mild detergent or a gentle cleaning solution for routine maintenance.

Please note that the frequency and method of cleaning may vary depending on the type and texture of the coating applied. Detailed maintenance instructions tailored to your specific coating system will be provided upon completion of your project, ensuring you have the necessary guidance for optimal care.

Lifespan

PermaSurface coatings systems are engineered to provide durable, high-performance surfaces designed to withstand years of service under normal wear and usage. Our seamless flooring systems offer superior ease of cleaning compared to traditional flooring, thanks to the absence of cracks, seams, or crevices where dirt and contaminants can accumulate.

While **PermaSurface** coatings are built for longevity, regular maintenance is key to maximizing their lifespan. To help extend the life of your coating system, we recommend implementing a routine cleaning schedule and conducting periodic inspections.

Here are some essential guidelines to ensure your coating continues to perform at its best:

Regular Cleaning: Consistent and proper cleaning significantly extends the life of your floor or other coated surface.

Routine Inspections: Conduct regular checks to identify any potential issues early.

Avoid Improper Use: Prevent damage by ensuring the coating is not subjected to harsh conditions or misuse.

Topcoat Reapplication: Reapplying the topcoat every 3-5 years will refresh the surface and maintain its appearance and durability.

By following these simple recommendations, you can preserve the performance and appearance of your **PermaSurface** coating, ensuring it remains a long-lasting investment for your space for years to come!

Choose PermaSurface With Confidence.

Why Choose PermaSurface?

With over 50 years of combined expertise, **PermaSurface** is a trusted provider of high-quality coatings, polishing, and waterproofing solutions. *Our extensive experience ensures that we deliver results that meet and exceed expectations.*

PermaSurface is the preferred choice for property and facilities managers, architects, designers, contractors, and homeowners alike. Our commitment to superior quality, long-lasting durability, and aesthetic beauty makes us the go-to solution for a wide range of projects.

From residential complexes and fine homes to schools and commercial facilities, **our systems have been successfully installed across thousands of square feet.** We back all our products with warranties and subject them to rigorous durability testing to ensure they stand the test of time.

At **PermaSurface**, we pride ourselves on using only the highest-quality systems, tailored to meet your specific coating needs. When you choose **PermaSurface**, you're choosing a solution built to last.

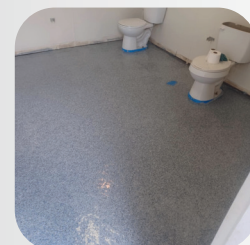

If I decide to go with PermaSurface, how do I proceed?

To get started, just get in touch.

The best way to kick off your project is by reaching out to **PermaSurface** directly. We're here to answer your questions, provide expert advice, and guide you toward the ideal solution to meet your goals.

Whether you prefer to fill out the form at **permasurface.com**, email us at **info@permasurface.com**, or give us a call at **636.367.3762**, our team is ready and eager to help.

We look forward to discussing your project and assisting you in selecting the perfect coatings system that will provide lasting satisfaction for years to come. Let's make your vision a reality!

Timely Completion

At **PermaSurface**, we are committed to delivering exceptional results that exceed expectations, ensuring every project leaves our clients fully satisfied. *Your satisfaction is our top priority.*

What We Deliver

DECORATIVE COATINGS SYSTEMS

We offer a wide variety of patterns and designs, including stunning simulated finishes like brick, tile, hardwood, granite, marble, terrazzo, quartz, slate, and stained effects. With limitless design and color options, we can create a truly unique look that will exceed your expectations and leave you amazed by the possibilities.

Graniflex System

Durable & Versatile: Ideal for both exterior and interior surfaces like pool decks, driveways, and garage floors.

Crack-Resistant: Flexible Penetration Technology ensures long-lasting crack resistance, preventing brittleness.

Customizable Design: Thousands of colorful chip combinations for a granite or quartz-like finish on any surface.

High Performance: Chemically resistant, wear-resistant, and provides excellent physical strength and texture options.

Moisture Protection: Offers superior moisture control and protection for concrete floors.

Eye-Catching Design: Metallic Marble Concrete Stain combines industrial-strength epoxy with metallic pigments for a stunning, three-dimensional color depth.

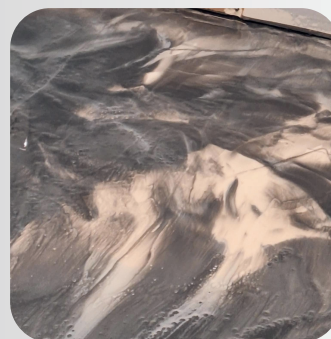

Customizable Finish: Achieve a high gloss finish or add a satin urethane topcoat for a sophisticated, marble-like appearance.

Enhanced Durability: Slip resistance and UV blockers are available, preventing discoloration and ensuring long-lasting beauty.

Versatile Application: Perfect for both business and home environments, enhancing any space with a luxurious, modern look.

Guaranteed Impact: Deliver a "WOW!" factor with a floor that impresses and elevates your remodeled project.

Metallic Marble

Rustic Concrete Wood

Exceptional Durability: Stronger than concrete, providing a long-lasting, reliable surface for any space.

Authentic Wood Look: Detailed texture with grain, knots, and nail holes for a realistic hardwood appearance.

Endless Design Options: A wide range of stains, from rustic to modern, to suit any style or color preference.

Moisture & Wear Resistant: Unlike laminate, this system won't be damaged by moisture, making it perfect for high-traffic or damp areas.

Versatile & Eco-Friendly: Ideal for basements, patios, commercial spaces, and even garage floors—pet-friendly and sustainable for a variety of applications.

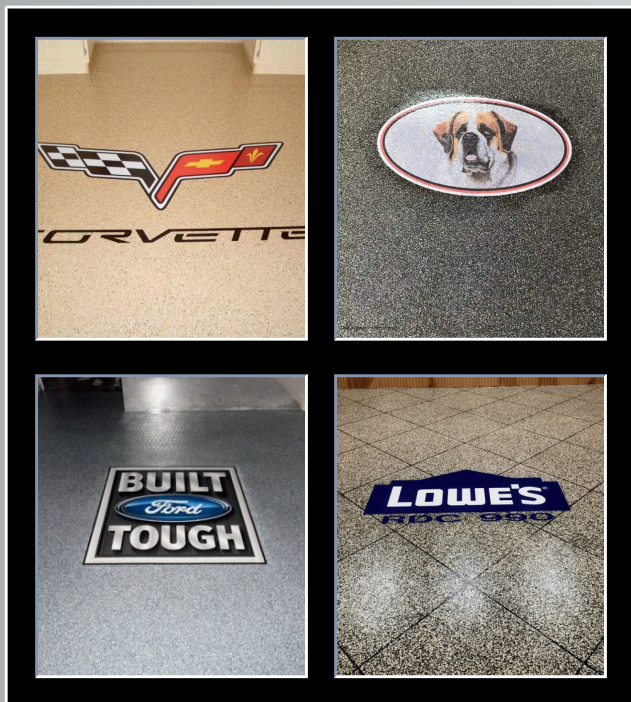

What We Deliver

Protector Color Flakes	Custom Looks: 150+ colors and 6 flake sizes for endless design options. Built to Last: Tough epoxy, urethane, and polyaspartic resins resist wear and damage. Easy Care: Simple to clean and maintain, even in high-traffic areas. Slip-Resistant: Textured surface adds safety without sacrificing style. Great Value: Durable, decorative, and cost-effective flooring solution.
Tuscan Slate	Durable Finish: Polymer Tuscan texture for a lasting, decorative surface. Versatile: Ideal for patios, sidewalks, basements, pool decks, and more. Slate Look: Mimics the appearance of high-end slate flooring. Customizable: Add antiquing and pigments for unique designs. Elegant Style: Luxurious finish for indoor or outdoor spaces.
Grand Flagstone	Timeless Design: Inspired by 13th-century European castles for a classic, elegant look. Stone Look, Lower Cost: Get the appearance of authentic stone without the expense. Versatile Use: Great for patios, pool decks, porches, and more. Handcrafted Finish: Troweled textures and custom patterns for a one-of-a-kind look. Realistic Appeal: Antiquing layers create a natural flagstone effect.
Italian Marble	Timeless Luxury: Italian marble-inspired look rooted in classic elegance. High-End Epoxy: The first marble-look epoxy floors for premium spaces. Realistic Veining: Spray technique creates stunning marble patterns. Rich Finish: Metallic stain enhances depth and authenticity. Sophisticated Style: Elevates any residential or commercial space.
Marble Flex	Luxurious Look: Delivers the elegance of real marble with stunning veining and rich color options. High-End Appeal: Perfect for upscale spaces that demand a standout finish. Industrial-Grade Strength: Built on the proven durability of the Graniflex system. Crack-Resistant: Flexible and resilient—ideal for both indoor and outdoor use. Versatile Application: Great for entryways, showrooms, patios, and more.
Epoxy Tile	Elegant Tile Look: Mimics granite or quartz tile—no grout lines. Durable & Resistant: Enhanced chemical resistance for long-lasting use. Sleek Finish: UV-resistant topcoat creates a smooth, showroom-ready surface. Real Tile Aesthetic: Offers the look of tile with epoxy strength. Low Maintenance: Easy to clean and built to last.
Quartz	Hygienic & Seamless: Non-porous surface resists mold and bacteria. Durable & Low Maintenance: Built for high-traffic areas and easy upkeep. Enhanced Protection: Outperforms traditional tile and grout systems. Designer Options: Stylish, pre-designed color patterns for everyday use. Custom Quartz Blends: 40+ colors and two sizes for unique project needs.

Make It Personal

CUSTOM 3D FLOORING LOGOS

Take your floors to the next level with embedded, UV-resistant logos that become a permanent part of any **PermaSurface** Floor System. Unlike vinyl stickers, our fabric-printed graphics create a striking 3D effect that adds both value and a personalized touch. Whether you want a bold garage floor logo or a custom design for a commercial space, our in-house graphics team can bring it to life—up to 4 feet high and any width. Make every floor stand out with a look that's as durable as it is distinctive.

CUSTOM BORDERS

A Custom Border allows you to add a personalized touch to your concrete surfaces with a unique and eye-catching border design. Our skilled craftsmen can create custom borders using various techniques, including patterns, intricate designs, or contrasting colors. Our team will work closely with you to bring your vision to life. Elevate the aesthetic appeal of your concrete surfaces with a custom border that reflects your style and adds a distinctive flair to your space.

Polished concrete is a mechanical process that involves grinding and polishing concrete floors using industrial diamonds, hardeners, and sealers. This process levels, densifies, and seals the concrete while enhancing its natural beauty by creating a smooth, reflective surface.

GRIND & SEAL

Revitalize your concrete surface with our professional **Grind and Seal System**, featuring our high-performance Neat Coat Epoxy. This process begins with precision grinding to smooth and prepare the surface, revealing the natural character of the concrete. We then apply a durable epoxy coating that enhances the floor with a sleek, glossy finish that is both attractive and easy to maintain. Ideal for residential and commercial interiors, this system offers lasting protection and a polished, modern look.

Finish: High-gloss for enhanced durability and appearance
Surface Prep: Mechanically ground for optimal adhesion and smoothness

HYDRO-POLISH

Hydro Polish™ offers advanced protection for polished concrete by addressing its primary weakness—stain susceptibility. Unlike traditional surface sealers that wear away quickly, **Hydro Polish™** penetrates deep into the concrete, forming durable, watertight silicone molecules within the pores for long-lasting defense against oils, acids, and everyday spills such as wine or coffee.

Designed to work in combination with our Sealer and Fortifier systems, **Hydro Polish™** helps create a triple-tight seal for superior stain resistance and lasting visual appeal. Its concentrated, phosphate-free formula contains no sodium hydroxides or butyls, making it a safer, eco-conscious choice. Packaged in concentrate to reduce environmental impact and shipping costs.

Finish: Enhances stain resistance without altering appearance

Eco-Friendly: No harsh chemicals; low environmental impact

Durability: Long-lasting protection that won't wear away

Multi-Stage Grinding for a High-Luster Finish

The process includes multiple grinding stages, progressively smoothing the concrete surface to achieve a high-gloss finish. This results in a durable and visually appealing floor that lasts for years.

Customization Options for Luxury Appeal

Polished concrete is highly customizable. Aggregates, dyes, acid stains, and even custom graphics can be incorporated to create unique, luxury finishes tailored to any design preference or space.

Cost-Effective & Long-Lasting

In addition to its long lifecycle, polished concrete is an affordable flooring option. Its low maintenance requirements and resistance to wear make it a cost-efficient choice over time.

Extensive Benefits for Any Space

Beyond aesthetics, polished concrete provides a durable, non-porous surface that resists staining, dust, and moisture, making it ideal for high-traffic areas such as hospitals, schools, retail stores, and government buildings.

Scientific Concrete Polishing

TRANSFORM Ordinary Concrete into a Showroom Masterpiece!

Why Choose Scientific Concrete Polishing?

- ✓ **Showroom-Quality Shine**
Achieve a flawless, high-gloss finish that turns ordinary concrete into a statement surface. Our cutting-edge polishing solutions bring out the natural beauty of concrete with mirror-like clarity.
- ✓ **Superior Strength & Durability**
Formulated to penetrate deep into the concrete, our products fortify surfaces against wear, tear, and heavy traffic—perfect for busy environments that demand resilience and low maintenance.
- ✓ **Eco-Conscious Solutions**
Sustainability matters. Our products are low-VOC and environmentally friendly, helping you create healthy, green-certified spaces without sacrificing performance.
- ✓ **Enhanced Safety**
With built-in slip-resistant technology, our polishing systems increase traction without compromising style—ideal for both residential and commercial applications.
- ✓ **Versatile Applications**
From floors and countertops to walls and decorative features, our products work across a wide range of surfaces and project types, giving you design freedom without limits.

Elevate Your Spaces with Scientific Concrete Polishing

In the world of architecture and interior design, concrete has become more than just a structural element—it's a canvas for creativity, durability, and design innovation. Whether you're enhancing a high-end residence, a sleek commercial space, or a robust industrial facility, polished concrete delivers unmatched performance and visual impact.

At the heart of this transformation?

Scientific Concrete Polishing - engineered to deliver brilliance, longevity, and sustainability.

THE POLISHING PROCESS:

From Concrete to Captivating

Surface Prep - We begin with a meticulous cleaning and repair phase, using professional-grade solutions to ensure a flawless foundation.

Grinding & Honing - Using progressive diamond abrasives, we refine the surface, removing imperfections and preparing it for the ultimate shine.

Polishing - Our proprietary polishing products are applied in multiple stages, enhancing depth, clarity, and reflectivity for a truly stunning finish.

Sealing & Protection - We seal the surface with premium protectants that resist stains, chemicals, and moisture—preserving the beauty and extending the life of your polished concrete.

LONG-LASTING BEAUTY, EASY MAINTENANCE!
KEEP YOUR POLISHED CONCRETE LOOKING PRISTINE WITH MINIMAL UPKEEP.
OUR PRODUCTS OFFER EXCEPTIONAL RESISTANCE TO SCRATCHES, STAINS, AND FADING—
BACKED BY LONG-LASTING PERFORMANCE AND SIMPLE CARE.

What We Deliver

INDUSTRIAL & COMMERCIAL FLOORING

- ✓ **High-Performance**
- ✓ **Chemical, UV, and scratch resistant**
- ✓ **Long-Lasting Protection of Concrete**
- ✓ **Antimicrobial Additives**
- ✓ **Slip Resistance**
- ✓ **Thermal Shock Protection**

Resinous 123 Floor System: Seamless, Durable, and Versatile

For large spaces that demand a high-performance, seamless finish, our Resinous 123 Floor System is the ideal choice. This 100% solid color epoxy system, topped with a durable urethane coating, provides a sleek, clean look that resists chemicals, UV damage, and scratches. The finish can be enhanced with a clear urethane topcoat for added protection and shine. Perfect for facilities requiring USDA-approved seamless flooring, the Resinous 123 system ensures long-lasting performance and easy maintenance, all while seamlessly blending with your existing design.

ICI Epoxy: Industrial, Commercial, & Institutional

With this system, our Neat Coat is a 100% solids, two-component cycloaliphatic amine ICI epoxy designed for maximum durability. This high-performance floor coating resists abrasion, withstands common chemicals, and protects against foot traffic, keeping concrete floors looking great and lasting longer.

ESD Anti Static Flooring System

Our ESD Flooring is a high-build, colored epoxy coating system designed to safely dissipate static electricity in sensitive environments. Ideal for computer rooms, labs, hospitals, and electronic manufacturing areas, it offers excellent chemical and abrasion resistance while maintaining a clean, professional appearance. Applied at 4 to 6 mils, this anti-static solution is available in multiple colors and is perfect for any space requiring static control.

POLY-HARD - Self-Leveling Urethane Slurry Flooring System

Polyhard SL is a low-odor, solvent-free, self-leveling urethane slurry flooring system designed for industrial environments that demand maximum durability. Resistant to thermal shock, impact, chemical exposure, and moisture vapor, it offers a long-lasting, high-performance solution. Installable from 1/8" to 3/16" with optional media broadcast, it's versatile, easy to apply, and ideal for creating superior floors in food processing, manufacturing, and other heavy-duty settings. Polyhard SL also meets USDA flooring requirements, with optional broadcast and topcoats to enhance performance and appearance.

Waterproofing & More

SANI-TRED® SYSTEMS

For over 20 years, SANI-TRED® has led the industry with the world's first and only permanent indoor waterproofing system—PermaFlex™. Engineered to seal even the most damaged or wet surfaces, SANI-TRED® delivers unmatched protection and peace of mind backed by a lifetime warranty. Trusted by thousands of homeowners and professionals alike, our high-performance liquid rubber coating system is over four times stronger than other waterproofing products and offers superior versatility. **From basement waterproofing and radon mitigation to pool repairs, roof coatings, and more**, SANI-TRED® is the go-to solution for long-lasting, problem-solving protection that adds real value to your property.

Flexible Penetration Technology®

PermaFlex deeply penetrates the pores of building materials and cures to a durable, tire-like toughness, ensuring that SANI-TRED® products are impervious to bubbling, peeling, or delamination.

Permanent Elongation Technology®

Sani-Tred products never become harder or brittle with age, they maintain their flexibility indefinitely. Sani-Tred products have over 590% elongation!

Elongation Memory Technology®

This unique physical property ensures that SANI-TRED® products retain their original shape and size, even when subjected to compression, stretching, and relaxation.

WATERPROOFING & SEALING:

- Basement, Pool, Roof, Manhole, Elevator Pit, & Tunnel Sealing
- Wastewater Treatment, Grain Bin, & Irrigation Ditch Sealing
- Secondary Containment for Liquid Fertilizers & Underground Home Waterproofing
- Car Wash, Truck, & Septic Tank Coatings

AGRICULTURAL & ANIMAL CARE:

- Feed Lot Coatings
- Animal Floor Installations
- Hog Slat Repair & Coatings, Sow Farrowing Systems

MARINE & AQUACULTURE:

- Fish Tank & Pond Coatings (Steel & Concrete)
- Boat Coatings (Anti-Fouling, Above/Below Waterline)

INDUSTRIAL & COMMERCIAL:

- Factory, Concrete Floor, Freezer Interior Coatings
- Grain Elevator Pit, Salt Corrosion, Fertilizer Building Protection
- Stock Trailer, Dump Trailer, & Pick-Up Bed Liners

IF YOU WON'T PROTECT YOUR CONCRETE NOW, HOW WILL YOU AFFORD TO REPLACE IT LATER?

It doesn't have to end up like this.

Concrete may be tough, but it doesn't last forever. Exposure to rain, freeze-thaw cycles, and road salts can cause it to crack and deteriorate. We've all seen driveways and surfaces that have failed—but the good news is, you can prevent this damage easily and affordably with **PermaSurface**. Whether you're a DIYer or need professional sealing services, we offer high-quality sealers and expert services to protect your concrete. Don't wait for costly repairs—protect your concrete now and extend its life for years to come.

PROLONG THE LIFE & APPEARANCE OF YOUR CONCRETE SURFACES!

It's A Fact!

Concrete Deteriorates

Concrete absorbs water, chemicals, and deicers, causing damage that leads to costly repairs. Freeze-thaw cycles, salt, and acid rain create cracks, spalling, and pits. Sealing with **PermaSurface** prevents these issues, preserving your concrete's strength and beauty for years.

Don't wait for damage to happen. Choose **PermaSurface** to protect your concrete, enhance your curb appeal, and avoid expensive replacements.

Our Hydrophobic Sealer:

- ✓ Provides an easy to clean, low maintenance surface
- ✓ Provides excellent water repellency
- ✓ Protects against freeze/thaw damage
- ✓ Resists scaling & popping
- ✓ Protects against salt damage
- ✓ Resists oil and chemical stains
- ✓ Protects from harmful UV rays

Can be installed over concrete, asphalt, brick, wood, steel, tile, flagstone, and even dirt.

ELASTASTONE RUBBER SURFACING IS PERFECT FOR:

- ✓ Pool-Decks
- ✓ Patios & Walkways
- ✓ Driveways
- ✓ Playgrounds
- ✓ Gym & Fitness Areas
- ✓ Commercial Entryways

Premium Safety, Comfort, and Aesthetic Performance in One Innovative System

ElastaStone is a cutting-edge rubberized surfacing system designed to transform existing concrete into a seamless, slip-resistant, and visually striking surface. Engineered using high-quality EPDM rubber granules and a proprietary binder, ElastaStone is hand-troweled on-site to create a resilient, long-lasting finish ideal for both residential and commercial applications.

This pour-in-place system combines the comfort of rubber with industrial-grade durability, delivering a solution that's not only beautiful but also built to perform under pressure—whether it's underfoot at a playground, pool deck, or a high-traffic walkway.

ElastaStone is more than a surfacing solution - it's a high-performance upgrade that enhances safety, comfort, and curb appeal while reducing maintenance & long-term costs. Deliver a better surface experience with ElastaStone.

Why ElastaStone Outperforms Other Rubber Surfacing Solutions

Premium Materials

ElastaStone uses high-quality EPDM rubber granules—offering superior UV resistance, color retention, and flexibility—unlike many systems that rely on lower-grade or recycled fillers.

Advanced Bonding System

Its proprietary binder ensures a stronger, longer-lasting bond to concrete, minimizing issues like peeling or cracking common in other rubber surfaces.

Seamless, Custom Installation

Poured and hand-troweled on-site, ElastaStone delivers a smooth, tailored finish that conforms to any surface—unlike prefab tiles or mats.

Unlimited Design Options

With a wide range of colors and patterns, ElastaStone allows for full customization to match any style or brand.

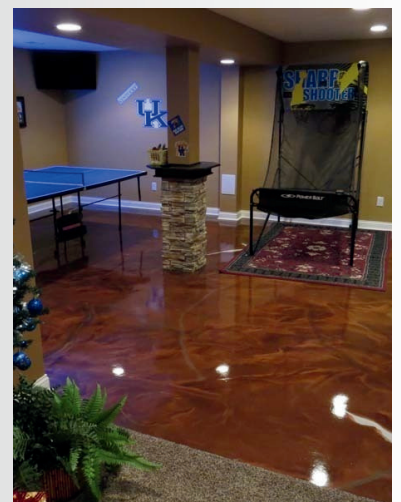

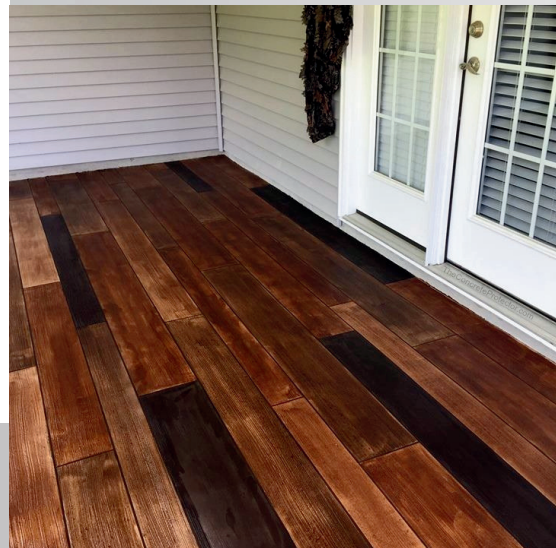

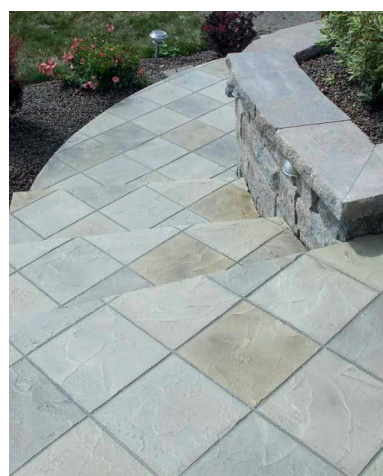

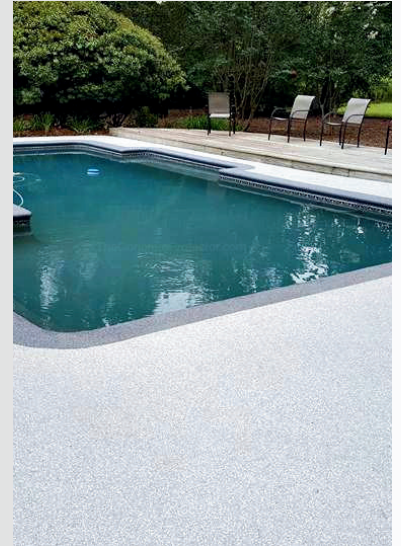

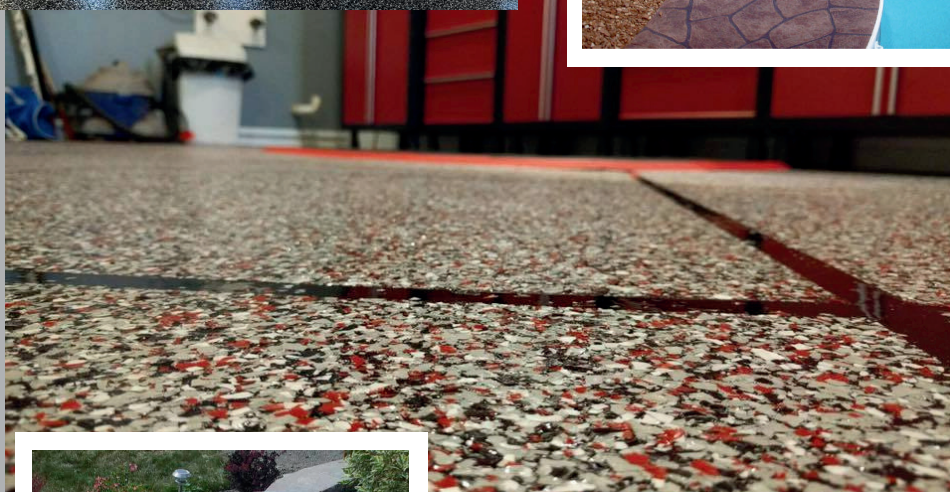

Built for Harsh Conditions

Engineered for long-term performance, it resists fading, wear, and weather damage—even in extreme climates.

Safer & More Comfortable

Slip-resistant with a cushioned feel, it's ideal for high-traffic, wet, or recreational areas.
